**Funding Achievements**

In 2013, I was part of the successful project consortium SUN (Sustainable Nanotechnologies). This is a European Commission Framework Programme 7 (FP7) project. Project number 604305, Call (part) identifier FP7-NMP-2013-LARGE-7. The total estimated project cost is €13,520,634.40 with €10,249,962.20 requested from the EU. I directly contributed to the submission document to the Commission that included specifying UL’s scientific and research role in the project.

In 2012 I was awarded a Fulbright Research Scholarship from the Fulbright commission. This research will take place in the McCombs School of Business at the University of Texas at Austin.

In 2012, was part of the successful project consortium Safe Nano Worker Exposure Scenarios (Sanowork) which received a total budget of €4.8M from the EU's Seventh Framework. The main goal of Sanowork project is to identify a safe occupational exposure scenario by exposure assessment in real conditions and at all stages of nanomaterials (NM) production, use and disposal.

In 2010, was part of a team that received €250,000 from Enterprise Ireland and Aldus Aviation Ltd. The project title is “Aldus Aviation Structured Lease Solutions & Risk Management Systems”. The project seeks to implement new aviation leasing agreements using financially engineered capital market and commodity products.

In 2005, I received €10,000 from the University of Limerick Centre for Teaching and Learning to develop an equity derivatives trading simulator for use in classroom as an advanced teaching aid.

**International Links**
I developed an exchange programme with the School of Economics and Management, Tongji University, Shanghai. This has resulted in the successful exchange of postgraduate students from the University of Limerick to Tongji University and visa versa.
