

Dear all,

As mentioned last week, UL is taking part in a HSE led Rapid Antigen Diagnostic Test (RADT) pilot to establish the feasibility of the implantation of such testing at scale in education settings. We are looking for staff or student participants who are over 18 to take part. You will be asked to carry out antigen tests at home on 2 days per week (3 - 4 days apart) for 4 weeks and report your results to the HSE. UL will not have sight or access to your test results.

If you would like to volunteer to take part, follow this [link to the dedicated RADT SharePoint site](#) to sign up. Please note that only staff or students with a valid @studentmail.ul.ie (students) or @ul.ie (staff) email address will be able to access the site. Once you have signed up, you will receive an invitation to collect your RADT kit the week after the recruitment of participants ends. For queries about the RADT, email RADT@ul.ie

For more information about the project, please go to the [Antigen Test Pilot](#) section on the UL COVID-19 website.

Finally, it was reported at the Space Management Committee (SMC) yesterday, that appointed COVID-19 Worker Representatives are not required to be physically present in the workplace at all times. Departments are required to download and provide a copy of the Management of a Suspect Case SOP and provide details of the available Isolation Rooms to those conducting teaching outside of normal campus hours. These are available in the  [Managing a Suspected Case of COVID-19 on Campus](#) folder on the COVID-19 SharePoint site.
