

UNIVERSITE DU HAVRE, LE HAVRE

Address	25 rue Philippe Lebon BP 1123 Le Havre Cédex
Telephone/Fax	0033 02 32 74 42 26 Fax : 0033 02 74 41 82
www-address	www.univ-lehavre.fr
Contact person (Socrates coordinator) and e-mail	Sandrine DANGER-PUJOL sandrine.danger.pujol@univ-lehavre.fr
Areas of concentration (for example foreign trade, marketing, etc.)	<p><u>UFR Science and technical</u> Aroma and perfume <u>ISEL (logistic)</u></p> <p><u>FACULTÉ DES AFFAIRES INTERNATIONALES</u> <u>FACULTY FOR INTERNATIONAL AFFAIRS</u></p> <p>Droit (Law) : includes degrees in public and private law up to 4-year degrees (maîtrise), and a dual diploma with Germany can be offered. Next year (2002), a new 5-year course (DESS) specializing in a dual diploma with Australia will also be offered.</p> <p>AES (Economics and Management) : A multidisciplinary course including law, economics, social sciences and languages. The department offers several four-year degrees (maîtrise).</p> <p>Anglais (English language studies) : This also offers a 4-year course (maîtrise), specializing in the study of the English language. This maîtrise specializes in the study of the British Commonwealth.</p> <p>Institut des Langues et Civilisations Orientales (Asian Languages and Civilizations) : The only one of its kind in France, except for INALCO in Paris (often referred to as “Langues Orientales”) with which we have formal links. This means that students in Le Havre can go on with their studies up to doctorate level.</p> <p>Filières Professionnalisées (vocational courses) : They offer a choice of 4- and 5-year degrees in various</p>

fields :

Maitrises (4-year degrees) :

Commerce Extérieur et Finances Internationales (Foreign Trade and International Finance),
Transport International (International Transport),

Commerce avec l'Asie (Trade with Asia),

Commerce avec l'Amérique Latine (Trade with Latin America),

Traduction et Communication Commerciale en Affaires Européennes (Communication and Translation for European Affairs).

Institut Universitaire Professionnalisé : Licence - Maîtrise en Commerce-Vente (*vocational course in commerce*) :

Together with the basics of trade and commerce, the students learn languages, economics, marketing techniques, engineering in sales, buying and trading in industrial products, international negotiations, etc. The course includes internships with companies in France and/or abroad. The IUP has just opened (2000) a fifth year as a DESS.

UFR LETTRES & SCIENCES HUMAINES

FACULTY OF ARTS AND HUMANITIES

Département Lettres et Littérature (*French and Literature*) :

Here again, the students must take a foreign language. The basics are of course the French language, linguistics and literature.

Département de Sciences Humaines et Sociales (*Humanities and Social Sciences*) :

The students have a choice from :

History and Geography,

Geography and Sociology,

Sociology and History.

The study of a foreign language is compulsory. Other subjects include Anthropology, Geology, Biology, Law, Economics and Political Science.

The Faculty also offers :

DEA d'Aménagement du Territoire (*Land Management*),

DESS Stratégies d'entreprises et Logiques territoriales (*Business Strategies and Land Management*).

UFR SCIENCES & TECHNIQUES

FACULTY OF SCIENCES AND TECHNIQUES

2-year degrees (DEUG) :

Students are given a choice of four options to choose from :
Mathematics, Computer Science, Applied Sciences ;
Sciences of Matter ;
Sciences of Life ;
Sciences and Technology for the Engineer, with options :
Mechanics, Electrical Engineering, Computer engineering,
Civil Engineering.

Licence et Maîtrise (3- and 4-year degrees) :

MST Chimie et Industries connexes (Chemistry and Related Industries) :

Students are trained to become executives in the chemical and pharmaceutical industries.

Chemistry and Business Management, Business Law ;

Organic Synthesis and Structure-Activity Relations ;

Cosmetology ;

Chemistry of Scents, Aromas and Perfumes.

MST Techniques Avancées de la Maintenance
(*Advanced Techniques for Industrial Maintenance*) :

Mechanical Engineering ; Information Systems ; Electrical engineering.

MST Génie Civil (*Civil Engineering*) :

A broad course which also deals with port engineering.

LICENCES (3-year degrees at Bachelor level) :

Our Licences cover a variety of fields :

Electrical engineering ; Mathematics ; Computer Science and Multimedia ; Biology ; Physics; Mechanical Technology.

MAITRISES (4-year degrees) :

Mathematics ; Electronics, Automatic Electrotechniques ; Biology (Environmental Systems); Physics ; Mechanics and Technology ; Computer Science.

M Sc. and Doctorates :

DEA :

Civil Engineering ; Instruments and Commands ;

DESS :

Ports and Coastal Engineering ; Building Maintenance, Renovation and Rehabilitation ; Safety in Industrial Systems ; Electrical Engineering ; Design and Characterisation of Com-posite Structures.

INSTITUT SUPÉRIEUR D'ÉTUDES LOGISTIQUE (ISEL)
INSTITUTE OF LOGISTIC STUDIES

The studies are all-inclusive and last for five years, after

	<p>which the students are awarded a Titre d'ingénieur (Engineer, one of the most prestigious degrees in the French system). Students with an economic or social studies background may also be admitted (in the 3rd year). The course covers all aspects of logistics, port activities, packaging, waste management, flow, storage and supply of goods, together with business management and business law.</p> <p><u>INSTITUT UNIVERSITAIRE DE TECHNOLOGIE</u> <i>UNIVERSITY INSTITUTE OF TECHNOLOGY</i></p> <p>Students are offered vocational 2-year courses in ten different departments leading to careers in the secondary or tertiary industry. All courses include internships and a study of at least one language.</p> <p>Secondary Industries : Civil engineering ; Electrical Engineering and Computer Science for Industry ; Production and Mechanical Engineering ; Hygiene, Safety and Environmental Sciences ; Computer Science.</p> <p>Tertiary industries : Social Work ; Management of Businesses ; Logistics and Transport ; Information and Communication ; Trade Techniques.</p>
Preparatory language courses? (yes or no)	3 weeks only in september
Courses in foreign languages (for example: English)	German, English, Arabic, Chinese, Korean, Spanish, Italian, Japanese, Portuguese, Russian, indo-Malay and French. 12 foreign languages
Period of Exchange	1 semester 1 year
Term dates for the academic year 2003/2004	Summer semester : 22/09 au 06/12 Winter Semester 05/01 au 19/05
Cost of Socrates program (tuition costs)	
Additional fees (for example health insurance)	The mutual insurance company and the social security : SMENO and LMDE.
Accommodation (student's houses)	Student's halls of residence or private residence with the CROUS; The CROUS residences accommodate almost 150,000 students. Those whose incomes are limited and who are studying far from home as well as foreign students

	holding grants from the French government are given priority.		
Full-time workload (equivalent of ECTS per semester)	30 credits a year 60 credits a year		
Rent (in local currency)			
Living costs (2002-2003)		Price a month	Price a year
	CROUS room	119,67 €	1436,07 €
	Résidence	228,67 €	2744,08 €
	Apartment	274,41 €	3292,90 €
	Student residence	243,92 €	2927,02 €
	Hotel	457,35 €	6585,80 €
	For an apartment :		
		Price a month	Price a year
	Electricity Board/Gas of France	26,68 €	320,14 €
	Water	9,15 €	109,76 €
Insurance	3,20 €	38,42 €	
Total	39,03 €	468,32 €	
Other information	<p>Le Havre is only 200kms away from Paris, and a mere 35kms from world-famous Deauville. Yet it is the starting point for Northern Europe, Spain and Portugal, and Eastern Europe as well!</p> <p>The «Pont de Normandie» (inaugurated only a few years ago) links both sides of the Seine estuary and provides a non-stop motorway from the Channel Tunnel right through to Brittany, the South West coast of France and Northern Spain.</p> <p>Le Havre is also, and has been over centuries, a hub for international trade. Today, it is a port of call for over 200 regular sea-lines : it is linked to over 500 ports worldwide. Thus, Le Havre is the leading French port for foreign trade. At the same time, Le Havre airport provides regular flights to Luxemburg, Belgium, Rotterdam, Frankfurt, Lyon, Nantes or Bordeaux, and a number of seasonal flights. You can travel to and from LH any way you want : by train, by sea, by air and by road.</p> <p>In this city land and sea come together in a very subtle way. To the West and South, you will find the beach, the docks, the locks, the bridges, the canals and the marina. You may also get a surprise with the new project now under way «Port 2000», a fast turnover multimodal container platform. Port 2000 will provide facilities for the world's largest over-panamax containerships and their cargoes bound both for</p>		

other European ports and for destinations all over the world. To the North and the East is the «Plateau de Caux», with its rich farmland, and the towering cliffs, for which Etretat is very famous.

The colour of sport in Le Havre is blue : sky blue or navy blue, the traditional colours of the strip of Le Havre Athletic Club and its football and rugby teams. Blue sea and blue sky meet in windsurfing and waterskiing. Sport turns green on the Octeville and Etretat Golf courses, or white at the skating rink. Cultural activities are to be found everywhere : at the Volcan centre for theatre, cinema or music, in the museums and the art galleries (never forget that Normandy goes hand in hand with impressionism!), the libraries and booksellers as well as at the Docks Café arena or in the numerous cafés and discos for those looking for less heady stuff.

When facing a difficult situation, you can then approach a welfare officer. She will suggest solutions to your problems, let you know about all kinds of assistance to which you are entitled.
