

Dear Partner,

We are pleased to inform you that we offer new **course** taught in **English** for the **Spring Semester** in:

**Mechanical Engineering Semester** The two Mechanical Departments (Design and Development) of INSA Lyon offer a new semester program in Mechanics given in English. The target is to provide background information required to start a major in Mechanical Engineering with a focus on mathematical tools for engineers, an overview of mechanical engineering areas and a first course in Mechanics of Solids.

The program includes 4 scientific courses, given during our Spring Semester, from February to June:

- Mechanics of Solids (3 hours per week - 4 ECTS credits)
- Computational Mechanics (3 hours per week - 4 ECTS credits)
- General Physics for Engineers (3 hours per week - 4 ECTS credits)
- Introduction to Differential Equations (4.5 hours per week - 5 ECTS credits)
- Optional French as a second language

The program is dedicated to English speaking students in their 2° or 3° year of university. Students can either select the whole program (17 ECTS credits + French language courses) or choose one or more courses among the 4 courses and other courses given in French and offered by one of the Mechanical Departments.

This program aims at giving classes to a limited number of students for a better efficiency.

You will find here the description of the 4 modules:
