

Quality Policy

The International Education Division facilitates the International mobility of staff and students to and from the University of Limerick. In line with the University's Strategic Plan, International best practice, and a customer-centred ethos, the Division delivers an efficient, professional and educational service to its customers and stakeholders in the dynamic and bespoke setting that is International Education. This is attained through a fully committed team, regular customer feedback, a robust network of invaluable stakeholders, and a desire to remain nationally and internationally competitive and renowned in our field.

We aim to achieve this through the embracement of continued improvements through structured regular reviews of our Quality Management System.
