

Mandatory Public Health Requirements and Information

We hope that you are well and looking forward to your arrival at UL.

This email focuses on a checklist of the **Public Health Requirements** that you will need to complete.

1. Transport survey
2. Restricted movements
3. 14 days pre-arrival symptom tracker form (to be completed each day for 14 days before arrival in Ireland)
4. 14 days post-arrival symptom tracker form (to be completed each day for 14 days post-arrival in Ireland)
5. COVID-19 Passenger Locator Form
6. Download the COVID-19 Tracker App on arrival
7. Complete the 'COVID-19 Health and Safety at UL' training
8. Register with the UL Student Health Centre

To help you understand the Public Health measures that are required of you, we have created an overview of the necessary steps for a '**UL International Student Arrival**'. You can find this [here](#)

1. Transport survey

All UL International students entering Ireland from overseas (from countries which are not on the [Irish Government Green list](#)) are required to use a free national meet and greet service at the airport, which includes a free transfer for students living off campus.

This is a requirement by the Irish government.

- If you haven't already, please complete your arrival details [here](#) so that your free transport can be organised.
- The free transport will bring you directly by bus to all UL on-campus villages. For students living off campus, you will be brought to Troy village, from there we will arrange a private taxi to bring you to your off campus address.
- UL is only capable of arranging transport to the University of Limerick or the surrounding Limerick area. If you wish to be transported to any other part of Ireland, you will have to make your own arrangements and [avoid use of public transport](#) unless you are coming from a [green list country](#)
- Please provide your arrival details at least **7 days in advance** of arrival. If you fail to complete the arrival form in a timely and correct manner, then the nominated transport company will be unable to arrange your free transfer from the airport to the University of Limerick.
- Once the survey is completed we will share your arrival information with the transport provider who will then meet you at Dublin airport and arrange for your transfer. We are also arranging transfers for students arriving in Cork or Shannon airport.
- Please note **you must wait to complete the survey until your flight is booked**, as the information will be used to track your arrival and is a requirement of the Irish government.

- If you **cannot complete the survey** for a reason such as; you have already arrived in Ireland, you cannot fly due to a visa issue, you are doing your first semester from your home country, there are currently no flights from your home country, etc. – please email international@ul.ie (including your student number) and we will make a note of this in our records.
- If there is **any change to your flight**, please email international@ul.ie and resubmit the survey [here](#) so that the appropriate changes can be made to ensure that your transport is organised. If you do need to resubmit your survey, please add a comment in the 'Any other comment' section of the survey that you have updated with your new arrival details and submitted the form again.

What to expect at the airport on arrival

- There will be a presence in Dublin Airport in both Terminal 1 and Terminal 2 on the way to the coach parking area.
- You will need to look out for staff in high-visibility yellow jackets with handheld signage as per the 'International Higher Education Students: Greet & Transfer Service' images below.
- These staff will give you instructions and take you to the pick-up service.

2. Restricted movements

- The current Irish government advisory is for all international arrivals to Ireland (except for [green list countries](#)) to [restrict your movements](#) for 14 days. We will of course keep you updated on any future government travel advisory information.
- It is very important that you have your accommodation organised for the 14 days of restricted movements. You will need to give your accommodation address in the COVID-19 Passenger Locator Form (see number 5). Irish officials do check this information.

3. 14 days pre-arrival symptom tracker form

All students must complete this Pre-Arrival Daily Health Declaration each day for the 14 consecutive days prior to your travel to Ireland.

A member of staff at the university will be in contact with you to ensure the daily health declarations are being submitted, so that your enrollment at the University of Limerick can commence.

This daily declaration will decide the following:

- Individuals who indicate that they do not have any of the mentioned symptoms during the 14 days immediately prior to their trip may travel to Ireland (**Note:** Students will need to record 14 consecutive days with no symptoms).
 - Individuals who indicate that they do have one or more of the mentioned symptoms will need to record 14 consecutive days with no symptoms before traveling to Ireland.
- o If this means that you will not arrive in Ireland on time to start your programme, the university will make reasonable accommodation for you to be facilitated to start the programme remotely and then travel to Ireland when it is safe to do so.

For students arriving in less than 14 days:

- All students who are due to arrive in Ireland in less than 14 days must still complete the Pre-Arrival Daily Declaration for the amount of days remaining before your arrival.

If you have displayed any COVID-19 symptoms in the rest of the 14-day period leading up to now, please let us know by emailing ciara.kenihan@ul.ie

4. 14 days post-arrival symptom tracker form

All students must complete this Post-Arrival Daily Health Declaration each day for 14 consecutive days, beginning the day you arrive in Ireland.

A member of staff at the university will be in contact with you to ensure the daily health declarations are being submitted, so that your enrollment at the University of Limerick can commence.

Please remember to bring a thermometer with you to Ireland so that you can continue to track your symptoms for 14 days on arrival.

This daily declaration will decide the following:

- Individuals disclosing symptoms must immediately self-isolate and should contact the UL Medical Centre on 061 202 534. For urgent out of hours medical emergencies, please contact Limerick Doc on 087 755 1570

For students who have already arrived in Ireland:

- All students who have already arrived in Ireland must still complete the Post-Arrival Daily Declaration until your 14th day in Ireland. There is a question on the form which will ask you to indicate if you have had any symptoms since your arrival in Ireland.

5. COVID-19 Passenger Locator Form

- By law, **passengers arriving to Ireland from overseas** are required to complete this form. It is to help with contact tracing, more information can be found [here](#)
- It is an offence not to complete the form with a large fine and/or a prison sentence.

- From 26 August the form is now available online. **You can find the link to the form [here](#)**
- An officer at the airport or ferry terminal can ask for proof of the form and verification of the information supplied.

6. Download the COVID-19 Tracker App on arrival

- You are required to download the [COVID-19 Tracker App](#) to ensure that you remain safe and well while in Ireland
- The primary purpose of the app is to ensure improved contact tracing. Your data is protected and the app only alerts those that have come in to contact with a confirmed COVID-19 case.
- It is essential that you have your Bluetooth turned on for this app. Ireland as a country has embraced the app which makes it very effective.

7. Complete the 'COVID-19 Health and Safety at UL' training

- You will have to complete the 'UL COVID-19 Student Awareness' training.
- Please complete this training by carefully reading through this [PDF](#).
- This training is to ensure that you understand the importance of COVID-19 student health and safety measures at UL.

8. Register with the UL Student Health Centre

- On arrival to UL, you will need to register with the [UL Student Health Centre](#).
- This registration process can be done online. More information on how to register will be sent on this in a subsequent email.

We hope that this checklist has been helpful. It is very important that you follow these Public Health guidelines.

Do not worry if you are feeling nervous about your trip – this is completely normal especially this year! Remember that we want to ensure your arrival is stress free and that you have adhered to all guidelines.

As always, please let us know if there is anything we can help you with by emailing international@ul.ie
