

UL Global Quality Policy

UL Global facilitates the International mobility of staff and students to and from the University of Limerick. In line with the University's Strategic Plan, International best practice, and a customer-centred ethos, we deliver an efficient, professional and educational service to its customers and stakeholders in the dynamic and bespoke setting that is International Education. This is attained through a fully committed team, regular customer feedback, a robust network of invaluable stakeholders, and a desire to remain nationally and internationally competitive and renowned in our field.

We aim to maintain this through continued improvements and structured regular reviews of our Quality Management System.
