Certificate in Global Trade Compliance
NFQ Level 7
Transforming ambitious professionals into management leaders with recognised university accreditation

PROGRAMME PROFILE:
Ireland has a proven track record in the growth of global goods exports. This Level 7 programme was created to provide the participants with the necessary skills, knowledge and competencies to become highly effective in the global trade industry.

LEARNING APPROACH:
- Each is Module is delivered online both through Live Sessions and pre-recorded Lectures.
- Participants are expected to undertake private study sessions based upon guided reading, textbooks and self-assessment questions.
- An assignment is completed for each module, with detailed written feedback from tutors, ongoing coaching, advice and support provided for the duration of the programme.

CANDIDATE PROFILE:
- Do you aspire to or currently hold a higher level global trade position?
- Or to develop a range of skills including importing, exporting and classification procedures through a third level qualification in global trade compliance?

PROGRAMME OUTLINE

SEMESTER 1

MG2082 EXPORT IN THE CONTEXT OF GLOBAL SUPPLY CHAIN:
The aim of this module is to provide learners with an understanding of the key principles underlying export procedures and protocols within the EU and globally. It will provide learners with an understanding of the legislative basis and the mechanisms required for export compliance.

MG2052 ADVANCED PRACTICES IN CLASSIFICATION:
This module will provide learners with an understanding and practical ability to correctly classify, value and determine origin for materials being imported or exported by their organisations, the legislative basis and the mechanisms required for import and export compliance. Participants will learn to understand their role in compliance with global trade regulations and to apply practical export knowledge within their organisation

MG2062 APPLICATIONS OF SECURITY CONTROLS:
The aim and objectives of this module are to provide learners with an understanding of the main import and export security controls. Participants will understand their and their organizations obligations in complying with these controls and understand the frameworks and structures both within the EU and Internationally.

MG2072 PRINCIPLES 2:CUSTOMS CONTROLS:
The aim of this module is to provide learners with an understanding of customs controls and how they impact the organisation. It will provide learners with an understanding of the legislative basis and the mechanisms required for import and export compliance with customs in the EU

MG2092 IMPORTING IN THE CONTEXT OF THE GLOBAL SUPPLY CHAIN:
This module will provide learners with an understanding of the principles of importing into the EU and Ireland, the legislative basis and the mechanisms required for import compliance

SEMESTER 2

MG2141 SKILLS PORTFOLIO:
This module will provide learners with the ability to promote both the understanding and development of a range of skills appropriate to the performance of Global Trade Compliance, Import/Export and supply chain roles in modern organisations. It provides the learners with the opportunity to reflect on their previous experiences and past learning accreditations .

MG2022 CASE STUDY:
This module is designed to intergrade learning across a range of subjects within the Global Trade Compliance sector. To develop analytical skills in identifying the key management problems depicted within the case study. Apply knowledge and techniques gained across programme modules by solving the key management problem(s) identified

MG2151 STRATEGIC SUPPLY CHAIN & LOGISTICS FRAMEWORKS:
The rational for this module is to provide practical information for application in organizations as well as to develop the understanding of participants of how transport and logistics is part of the wider supply chain and to provide them with the knowledge base to develop the two concepts together to continue to drive growth and efficiency

PM2082 MANAGING CHANGE AND CONFLICT:
This module is designed to develop the knowledge and skills of the frontline manager to successfully manage change within their organisations. Explore the nature of organisational change and the internal and external sources of change. Develop an understanding of the key steps involved in successful change management including the management of human and social factors.

IE2011 INDUSTRY LEARNING PROJECT :
The aim of this module is to enable the student to combine previously learned course material with their individual talents in order to solve real-life industry projects. To develop in the students the ability to organise and direct their own work
