

Professional Diploma in Supply Chain Management

Programme Overview

The Professional Diploma in Supply Chain Management offers learners practical interactive knowledge required to manage today's global supply chains. Gaining theory, current practice and skills to increase supply chain performance within their own organisations.

Participants will learn to:

- Develop insights and understanding of the interrelationships and performance outcomes of relevant supply chain.
- Recognise effective supply chain management practices.
- Critique the current theory, practices and processes of specific supply chain management topics.
- Engage in critical discussions with fellow learners and identify, determine and discuss international current practice.

1 year part-time
(Online)
